SUMMARY

Frontend Developer specializing in building high-performance web applications using **React, JavaScript, TailwindCSS, and Framer Motion**. Optimized React implementations to reduce load times by **30%** and increase user engagement by **40%**. Experienced in developing **scalable e-commerce platforms** with modern UI frameworks and state management tools. Currently advancing **backend expertise** at **AltSchool Africa** to transition into full-stack development.

EDUCATION

AltSchool Africa

Backend Engineering | November 2024 - Present

- Specializing in **server-side development** and **API architecture**.
- Building **scalable backend systems** and optimizing **database performance**.

Nnamdi Azikiwe University | Awka, Anambra

B.Eng in Electronics and Computer Engineering | November 2019 - November 2024

- **Second Class Upper Division**
- **Relevant Coursework:** Computer Programming, Digital Electronics, Software Engineering.

WORK EXPERIENCE

Foretrust Digital Consulting Limited | Frontend Developer Intern

Frontend Developer | August 2023 - January 2024

- Developed **responsive web pages** using React and TailwindCSS, reducing load time by **30%**.
- Built **10+ reusable React components**, cutting development time by **40%**.
- Resolved **15+ bugs** and shipped **3 new features**, enhancing platform stability.
- Improved **code quality** through peer reviews, achieving **90% test coverage**.
- Enhanced collaboration with **structured pull requests** and clear documentation.

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, JavaScript, ReactJS
- **Frameworks/Libraries:** TailwindCSS, Framer Motion, Shadcn/UI, React Toastify, Recharts
- **Developer Tools:** Git, GitHub, VS Code
- **State Management:** Context API, React Hooks

- **Currently Learning:** TypeScript and Backend Development

PROJECTS

MetricSpace | Business Analytics Dashboard

- Engineered a comprehensive **business dashboard** for streamlined **management** and **data visualization** using **React** and **Context API**.
- Implemented interactive **analytics** with **Recharts** for **financial reports** and **executive insights**.
- Designed a **responsive UI** with a **collapsible sidebar** and **theme support** using **TailwindCSS**.
- Integrated **real-time inventory tracking** and a **smart notification system** for **business metrics**.
- Enhanced customer management with **advanced search functionality** and **efficient state handling**.

Live Demo: [MetricSpace](#)

Shopique | E-commerce Fashion Website

- Developed an **e-commerce platform** with **React**, **TailwindCSS**, and **ShopContext**, featuring **50+ products**.
- Boosted **page load speed** by **30%** through **code splitting** and **lazy loading**.
- Secured **checkout** with **Stripe payment** and **real-time order tracking**.
- Achieved a **90+ performance score** on **Google Lighthouse** with **modern optimizations**.

Live Demo: [Shopique](#)

SkinScribe | Skincare Blog Platform

- Created a **responsive skincare blog** featuring **20+ articles** using **React & Framer Motion**.
- Designed an **interactive Skincare Quiz** with **5+ personalized recommendations**.
- Reduced **initial load time** by **40%** through **image optimization** and **lazy loading**.
- Ensured **99% design consistency** across **5 different viewport sizes**.

Live Demo: [Skinscribe](#)

Gadgety | Tech E-commerce Platform

- Built a **tech e-commerce platform** with **30+ products** using **React**, **TailwindCSS** & **Firebase**.
- Implemented **real-time search** and **filtering** across **5+ product categories**.
- Streamlined **checkout process** from **5 to 3 steps** while maintaining **security**.
- Optimized **responsiveness** across **mobile, tablet, and desktop (95% accuracy)**.
